

BIPLANTOL® *rosen NT*

The homeopathic plant strengthening tonic for roses

Biplantol® rosen *For the care, fortification and enhancement of all roses, wild roses, tea roses, rose hybrids and rambler roses.*

Mode of action by prophylactic and repeated application

- *Invigoration and fortification, regulation and activation of the plant metabolism*
- *Improved natural resistance in roses against fungal and parasitic attack*
- *Restoration of a healthy symbiosis between plant (root) and microorganisms in the soil*
- *Support of root regeneration and strengthening of the rhizome*
- *Stimulation of the growth and improved quality of roses*
- *Improvement of the soil in quality and structure by activating soil organisms*
- *Harmless to beneficial organisms such as bees and other insects*

These effects enable stressed plants to recover within a short period of time and strengthen the power of resistance against all kind of damage.

The active ingredients are absorbed by the capillary root, root bark, needles and leaves. The microorganisms in the soil are nurtured and their growth is stimulated.

Easy Dosage:

For spraying: **20 ml (5 tsp.) BIPLANTOL® rosen** are diluted in one liter water (1 quart). The plants and the soil are lightly soaked.

For watering: **2 ml (1/2 tsp.) BIPLANTOL® rosen** is mixed thoroughly with one liter water (1 quart) and the roses are watered evenly.

Application period: **BIPLANTOL® rosen** is applied from Spring (starting when the first small leaves are visible "mouse ear stage") to Fall at regular intervals of **two weeks**. For best performance alternate spraying and watering with **BIPLANTOL® rosen NT**.

N.B. The ideal complement for **BIPLANTOL® rosen NT** is **BIPLANTOL® mykos II**. Both solutions can be applied together.

Composition of the active agent:

The homeopathic active agent complex BIPLANTOL® rosen contains in a homeopathic dynamic form (D6-D100) among other things minerals as nitrogen, potassium, calcium, iron, magnesia, phosphor and essential trace elements like boron, organic germanium, silica, copper, manganese, uronic acids (plant mucilage) and rose extracts.

Biplantol rosen NT is approved by NOFA-Vermont, it is organic, and manufactured according to biodynamic principles.
